How to read the English Country Church

A summer's afternoon walk, the typical country church. This lecture will help you look at the architecture outside and inside, the church furniture, those mysterious nooks and crannies, high and low. How and why did it all come to look this way? This will be a fascinating journey through English history unravelled before your eyes. "I can't make you experts" says Nicholas Henderson, "but I can teach you enough to amaze your friends on that summer's afternoon walk".
